

THE CLINICAL **EXAMINATION**

Course code: CLNC101

 2 August 2023  [Read on The Donkey Sanctuary website](#)

This course is recommended for veterinary surgeons and veterinary students who occasionally see donkeys and wish to be more confident in their knowledge and approach to this species.

As the first course in the series on Veterinary Care of the Donkey, we recommend completing this course before moving on to further courses. It provides a detailed introduction to the basics of understanding the normal donkey examination.

Free online course for **professionals only**. Self-paced.

COURSE **DETAILS**

This course aims to cover the fundamental differences in the physiological and clinical parameters of a donkey compared to a horse. The basics of handling, examining the body systems, blood sampling, dental and lameness examination are covered. At the end of this course, students will have the skills to perform a detailed clinical examination and recognise normal versus abnormal in the donkey.

MODULES

This course is made up of six modules. These are discrete subject areas and will cover a range of issues relating to veterinary care and examinations.

1. Clinical Exam
2. Correct Approach to Examination of the Donkey
3. Taking and Interpreting a Blood and Faecal Sample
4. Dental Examination
5. The Basic Lameness Exam
6. References
